Do you have a bucket list? If you could view other peoples' bucket lists, imagine how much more creative it could get! Our team here at the Kool Kids on The Block has an idea for an application that would do just that. The home page will include everyone's bucket list items. It will show you if it has been completed or not. You can add the bucket list item to your memory box and put pictures add further description. If you created the bucket list item or memory you can edit or delete it. All your creativity will be saved on your dashboard. Possibilities are endless, approve me!

LOGIN / REG:

- register
- login
- cookie for userId
- Json Web Token for user

Register	Login

last	password
email	
confirm email	
password	
confirm pass	

HOME:

- bucket.find()
 - returns list of all
 - click on item to go to **SEE ONE**
- different color for complete

SEE ONE:

- memories.find({ _id : _id }) -> return list
- edit if creator
- add memory
- mark complete

Bucket List Name	Add Memory
Description	
edit form if creator	
user memory associated	img:
	price:
	additions:
	date:
user memory associated	hidden
	[creator: cookie]

3) Kool Kids on the Block

DASH:

- `memories.find({creator : Cookies.get('userId')})`
 - `->` return list
- `map list ->` show as edit form
